

Bachelor of Business Administration

- There are many benefits that can come from the BBA program here at the Naz
- I'm a current student in the bachelor of business administration program
- I'm a recent graduate of the BBA program
- I'm currently attending the bachelor's degree in business administration
- It was more of a personal goal than anything
- Based on the scheduling, the confidence, the support by the difference recruiters
- Because of the encouragement that I received from my classmates, the instructors, the staff even in the AGS office, they were always encouraging
- Realizing that I was able to plunge forward
- That gave me the confidence that I needed to break out and try something new
- And it did provide a challenge for me
- I had accumulated credits from several different universities before being able to tie them all together at MVNU
- I didn't have a lot of credits to transfer in and so I went through the general studies program for a year
- It meant that all that past work actually counted for something
- I had two years of prior college, had an associates degree, and I was able to get into this program and finish it all within the 22months
- I completed the BBA in 22 months
- And certainly it's been a great experience
