

## **Get started now!**

- Mount Vernon Nazarene University provides the tools that are necessary for you to grow.
- I really do believe the program is about the development of the whole individual and not just about degree completion.
- It made me realize that I do have the abilities to go out into the business world and do anything that I set my heart to.
- What I learned here is a way to discover God's best for my life
- And to enhance not only your life but the lives of others
- I was looking for a Christian background and certainly MVNU met my needs and requirements and I feel like I'm at home.
- Here I received the tools to encourage that community of faith wherever I might be.
- The faculty as well as all the support and administrative staff, they're all on your side, they're there to help you fulfill your goals.
- You're developing personal relationships with those people that I know are going to last a lot longer than just the program here.
- I love this program for that reason alone
