

## **Master of Business Administration**

- I'm currently enrolled in the master of business administration program here at the Naz.
- I'm a former and current student here. I graduated in 1992 with my bachelor's degree and I'm currently enrolled in the MBA program
- I earned my first master's in organizational leadership
- And I'm currently enrolled in the MBA program
- I'd made that final step and worked on/began my MBA and earned that also in 2007, all from Mount Vernon Nazarene University
- The faculty have all been incredible each of them have been very knowledgeable in whatever their field is, very challenging to me
- I was motivated by the different instructors, I was motivated by the flexibility in classes, the scheduling, that fact that the books were going to be brought to me, the fact that I only had to attend one location, I meant in the same classroom, I met with the same students everyday.
- I decided to continue on to the master's program so I could hopefully be an adjunct instructor here at the Naz or at any other university
- And then once I completed the bachelor's degree, I enjoyed it so much and found it so rewarding that I decided to continue in my education at MVNU with the master's program
- For me it was part of a larger process of personal development and preparation
